

A Natural bio-degradable ammonia binder with urease inhibitor

## Composition :

- Natural extracts of Yucca Plant (*Yucca schidigera*), ammonia binding agents, digestive enzymes and encapsulated beneficial bacteria.

## Key Benefits :

- Binds noxious gases, particularly ammonia in fish pond.
- Accelerates the breakdown of organic waste in fish pond.
- Enhances the intestinal enzyme system of fishes.
- Increases the digestibility and complete digestion in fishes.

## Dosages :

- 300-500 ml / Ha or 50 -100 ml / Kani ( Tripura & North East ) in fish pond (Depending on stocking density and days of culture, after mixing with sand and a little water and is to be applied evenly to cover the complete pond area once in 15 days) or 1-2.5 Litre / T of feed with a accurate addition and through mixing.

## Storage and Caution:

- Store in a cool and dry place. Keep the container closed when not in use.

## Presentation:

- 500 ml Plastic bottle.
