

EnvoMin™

A new improved mineral supplement
with growth promoter

Composition :

- Complex mixture of essential micronutrients in inert form with Ca, P, Na, K. Enrich with Amino Acids and high quality of growth promoters.

Benefits :

- Improves the colour of the pond by promoting phytoplankton bloom.
- Used as pond soil fertilization to promote the live food organisms and plankton.
- Optimizes FCR and maximizes productivity.
- Delivered both during the culture and enrichment stage.
- Gives better digestibility and disease resistance.
- Helps to develop immune response and defense mechanism.
- Regulates osmoregulation.
- Provide quality brood stock development.
- Maintain pH of pond water.

Dosages :

- 10 gm / Kg of feed for prevention.
- 15 gm / Kg of feed for treatment.
- For pond preparation 25 Kg / Ha or 4Kg / Kani (Tripura & North East) (1 mt water depth).
- 10 kg/ Ha or 1.6kg/kani for growth of fishes.
- Dosage and time can be adjusted as per prevailing culture conditions or as advised by our field staff.

Storage and Caution :

- Keep in a cool and dark place.

Presentation :

- 5 Kg & 10 Kg HDPE lined sack.
