Pure Plant Nutrients + Irrigation

Water - nature's gift to mankind is not unlimited and free forever. World water resources are fast diminishing and hence Drip Irrigation is Today's need of agriculture. Drip irrigation can help you use water efficiently. We are well aware that success of Drip irrigation system lies in precise application of nutrients hence Fertigation is a need for today's irrigation system. After extensive study of inter-relationship among soil, water, crop and related agro climatic conditions, InGene Organics evolved a power pack formulae **Nanozim Drip** suitable for Fertigation to deliver a measured quantity of nutrients at the root zone of each plant. This ensures that plant do not suffer from stress of two important inputs nutrient and water.

Nanozim™ Drip is an advanced technology formula developed out of extensive research on all commercial crops by ultra modern R & D centre of InGene Organics. **Nanozim™ Drip** is rich in natural nutrient supplements and micronutrient that deliver prime quality & superb yield of fruits, vegetables, plantation crops, spices and all other cash crops.

A totally customized formulation which ensures saving in nutrients, early maturity and a bountiful harvest, season after season. Apart from all this, savings in labour and fertilizer costs.

Salient Feature & Benefits of Nanozim™ Drip:

- 100% water soluble complementary nutrition with much added value.
- **Nanozim™ Drip** offers curative nutrition when deficiencies are noted.
- **Nanozim™ Drip** offers growth booster during critical stages of crop growth.
- Outstanding efficiency of nutrients with controlled release fertigation. Increase germination success and **white roots development**.
- **Nanozim™ Drip** promotes balance growth of plant. It builds up capacity of immunity against environmental stresses.
- **Nanozim™ Drip** boost blossom and fruit set. Shelf life of cut flowers, fruits & vegetables increases.

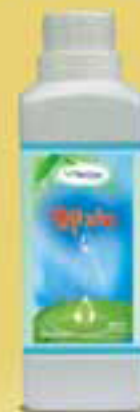

Dosage & Dilution:

Field trials under differential soil & climatic condition have proved that **Nanozim™ Drip** enhanced the quality & marketable significantly when applied at

- 1 - 2 Liter per acre per application in fruit crops
- 0.5 - 1 Liter per acre per application in Vegetable crops

Redefining Crop Protection !

We suggest **Intop**, **Omycin** and **Xmite** for control of fungal, bacterial and mite problems respectively. Use **Mixin** for better activity of Sticker, Spreader, Rainfastner & activator for superb results.
