

Effect of Biozyme Crop+ on Tomato

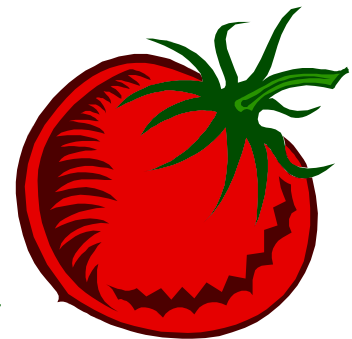

Key Results

	Treated	Control
Plant Height(cm)	108.0	72.0
No. of laterals/plant	8.0	4.0
Shoot biomass(g)	24.2	16.2
Root biomass(g)	4.2	1.9
No. of fruits/plant	28.0	18.0
Fruit yield/plant(g)	498.0	280.0

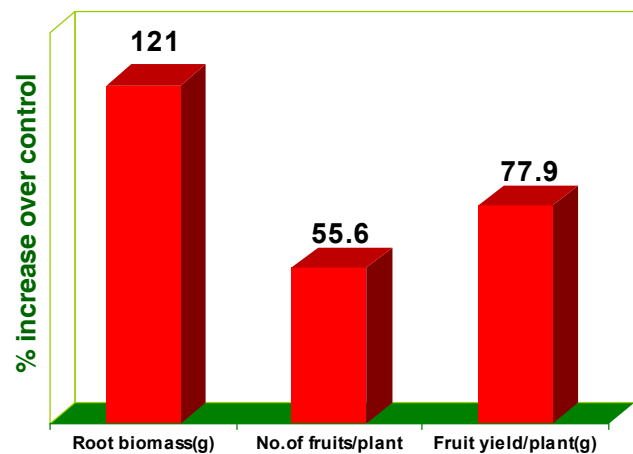

PROTOCOL

Crop	: Tomato
Institute	: Agril. College & Research Inst., Madurai, T.N., India
Product	: Biozyme Crop+
Applications	: 500 ppm. At two stages of plant growth.

Researchers' Conclusion

Foliar spray of 500 ppm. Of Biozyme were sprayed at two stages of plant growth. The results have indicated that Biozyme spray has increased plant growth, plant biomass, no. of fruits/plant and fruit yield significantly.
